PROJECT

Course Talk - HackPrinceton Nov. 2018

A web-based project focused on connecting students of a given university with courses in common by automatically adding them to group conversations restricted to said course.

Designed frontend using React.js.

Designed backend using two instances of Node.js, one to run the Web Application on Express.js and one to handle the React frontend.

Project bundled using Webpack.

Hosted on Heroku cloud platforms to work with apps hosted on GitHub.
